こゝろ さいく の じかん かん

How to make it

Glue all the clipped patterns to the corresponding position as illustrated.

Scissors with sharp blades are dangerous, so handle and use with care. The parent/guardian of a small child must always stay nearby to watch when the child is using scissors.

-  Cutoff line
-  Mountain fold
-  Place to apply glue

How to make it.

- 1** Apply Norino glue along the pink / green dotted areas.

- 2** Cut out each pattern with School Scissors.

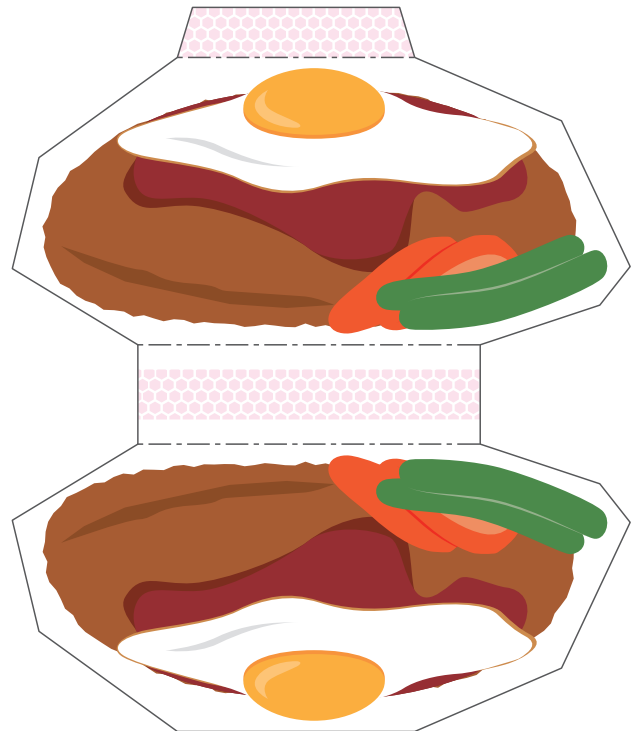

Handy hint!

First get a larger cutout than the actual shape, then trim off the excess edge to the precise shape.

School Scissors with non-stick fluorine-coated blades are useful, because glue does not stick on.

- 3** Fold and fasten off. Well done!

Norino, the glue tape for neat and firm adhesion.
